Combined NFPA 70e LV Arc Flash And HV Electrical Safety

[View Course Details](#)

COURSE DATES AND TIMES

April 22-23 , 2026

10:00 am - 4:30 pm ET

June 17-18 , 2026

10:00 am - 4:30 pm ET

August 19-20 , 2026

10:00 am - 4:30 pm ET

Why This Course Matters

Our NFPA 70E Arc Flash Training course is designed to help companies fulfill the requirements of OSHA 29 CFR Part 1910, Subpart S, Electrical, and NFPA 70E® “Standard for Electrical Safety in the Workplace,” which requires this type of instructor-led training for anyone working with electrically energized equipment. This course includes changes in the latest version of NFPA 70E.

[NFPA 70E Training](#)

[High Voltage Electrical Safety Training](#)

This course is instructed by one of North America's leading experts on Arc Flash and Arc Blast Hazard Protection and Mitigation. He will present new content NOT covered in our previous Arc Flash training courses and report on recent code revisions from NEC and NFPA. We teach general electrical safety principles and train electrical professionals to develop effective electrical safety programs. Between these two elements, there will be plenty of examples and exercises for delegates to follow and then take back and apply to their electrical safety work practices.

Our NFPA 70e Arc Flash Training course will teach you how to:

- Define Short Circuits And Electrical Arcs.
- Understand Arc Flash Parameters.
- Determine Energy Released During A Short Circuit And Why You Need To Be Protected.
- Learn Techniques For Reducing Arc Flash Energy.
- Learn How To Protect Yourself And Those Around You From Electrical Hazards.
- Learn How To Select Proper Personal Protective Equipment (PPE) For The Right Environment.

Dangers such as shock, electrocution, and arc blast will always be present on the job, but proper training and safety strategies can minimize the likelihood of injuries and fatalities. NFPA 70E - Electrical Safety in the Workplace - covers the full range of electrical safety issues from work practices to maintenance, special equipment requirements, and installation. In fact, OSHA in the United States already bases its electrical safety mandates on the comprehensive information in this important Standard.

High Voltage Safety Training

This 6-Hour (one-day) live online instructor-led course is designed for electrical maintenance personnel responsible for Medium Voltage/High Voltage electrical systems, and supervisory and health and safety professionals who oversee high-voltage electrical work.

Dynamic and highly concentrated, this High Voltage Safety Training course emphasizes safety when working on or near energized electrical equipment.

Students will learn the damage electricity can cause to the human body and understand the basic principles of safety in normal and abnormal conditions. They will also learn how to assist in determining the severity of potential exposure to Medium Voltage/High Voltage arc-flash hazards, plan safe work practices, and select appropriate personal protective equipment.

During this High Voltage Safety Training course, you will learn to recognize and avoid electric shock in unsafe work areas. You will also learn the correct approach distances. Upon completion, you will have a better understanding of properly voltage-rated tools and the use of proper personal protection equipment. By educating workers on issues central to the safe performance of their everyday jobs, you can reduce or eliminate workplace fatalities and serious injuries. Your safety and your coworkers' depend on it!

Review National and Provincial Medium Voltage/High Voltage electrical safety standards and regulations.

This One-Day High Voltage Safety Training Course Will Focus On The Following Areas:

- Job Briefing Requirements
- Hazardous Energy Control (Lockout/Tagout)
- Switching Procedures
- Clearance Procedures
- Personal Protective Equipment (PPE)
- Flame Resistant (FR) Clothing
- Rubber Protective Equipment
- Live-Line Tools & Testing Requirements
- Working On Or Near Exposed Lines
- De-Energizing Lines And Equipment
- Personal Protective Grounding
- Substation Safety
- Special Conditions
- Capacitors
- Current Transformers
- Potential Transformer Hazards
- Fuse/Relay Coordination

WHO SHOULD ATTEND

Anyone whose job involves designing, reviewing, evaluating or installing electrical systems, including: designers, installers, engineers, electrical contractors, technicians, project managers, safety managers, inspectors, and others who are involved in hands-on electrical roles or maintenance planning.

- Industrial, Commercial, Institutional Electrical Professionals
- Electrical Engineers
- Electrical Technicians
- Plant Electricians
- Linemen
- Electrical Supervisors
- Personnel Who Work On Or Near Energized Electrical Equipment And Systems

STUDENTS RECEIVE

- NFPA 70E and High Voltage Safety Training Certificate
- 1.2 Continuing Education Unit (CEU) Credits (12 Professional Development Hours)
- FREE 100-Page Digital Electrical Safety Handbook (Value \$20)
- \$100 Coupon Toward Any Future Electricity Forum Event (Restrictions Apply)
- FREE Magazine Subscription (Value \$25.00)
- Course Materials In PDF Format

COURSE OUTLINE

Combined NFPA 70e and High Voltage Electrical Safety Course Outline

DAY ONE

Electrical Hazards

- Five Main Factors In Electrical Accidents
- Electrical Shock
- Arc Flash Defined
- Incident Energy Defined
- Arc Flash Burn Injuries
- Arc Blast Pressure
- Inhalation Injuries

Existing and Proposed Standards

- NFPA 70e
- IEEE 1584
- OSHA
- Occupational Health And Safety Act And Regulations

Shock Hazards & Protection Strategies

- Understanding Shock
- Variables Impacting Hazard
- Protection Boundaries
- Voltage-Rated Gloves And Other Shock PPE
- Rated Insulated Tools And Other Equipment

Arc Flash Hazards & Protection Strategies

- Causes/Types
- Arc Blast
- Common Places
- Mitigating Hazard Through Engineering Design And Work Methods
- Arc Flash Boundaries
- Practical Application

Arc-Rated Personal Protective Equipment

- Overview
- Protecting Head, Hands And Feet
- PPE Programs: Categories, Levels, Systems
- Environmental Considerations
- PPE Guidelines And Maintenance

Job Planning

- Elements Of Safety Planning
- Job Briefing
- Energized Electrical Work Permit

Risk Assessment

- Components Of Assessment
- Methods: Tables Or Incident Energy Calculations
- Labeling
- Steps To Determine PPE Required
- Task Assessment Exercise

Safety Related Work Practices

- Defining “Electrically Safe Work Condition”
- Identifying And Securing Boundaries
- Tools And Equipment
- Best Practices For Lock Out/Tag Out, Verifying

DAY TWO

High Voltage Safety Training

Recognizing Electrical Safety Hazards - Where Do They Exist?

A detailed review of critical electrical safety hazards created by energized electrical equipment:

- Insulation
- Power Cables
- Power Transformers
- Instrument Transformers
- Dealing With Fault Currents
- Disconnect Switches
- Switchgear
- Circuit Breakers
- Fuses
- Electrical Relays
- Motor Starters
- AC/DC Motors
- Capacitors
- Emergency UPS Systems

Resolving Electrical Safety Hazards

Objective: Determine the controls used to protect workers from all energy sources created in the workplace. Benefits of a safe workplace include fewer injuries, lower worker compensation costs, reduced service interruptions, greater protection of capital investment, and increased uptime. This section will provide you with a detailed blueprint that maximizes electrical safety and all the benefits it generates.

- Hierarchy Of Controls
- Management Control
- Legislation
- Electrical Code
- Purchasing Controls
- Engineering Controls
- Training
- Safety Documentation
- Rules
- Safe Work Practices
- Safe Work Procedures
- Codes Of Practice
- Operating Procedures
- Permits & Clearances
- Switching Procedures
- Physical Equipment

- Personal Protective Equipment
- Safety Equipment
- Signs And Barriers
- Equipment Protection
- Interlock
- Grounding
- Field Control
- Inspections
- Job Planning
- Pre-Job Meeting
- Hazard Identification
- Hazard Reporting
- Work Methods
- Limits Of Approach
- Switching Practices

GENERAL ELECTRICAL SAFETY REQUIREMENTS

- Review Of Standards And OH&S Regulations
- HV Electrical Qualifications
- Poles And Structures
- Obstructions On Poles
- Properly Informing Electrical Workers
- Working In Service Rooms
- Space Around Equipment
- Working With HV Test Equipment
- Insulated Aerial Devices

SWITCHING

This section of the course will instruct how to: interpret and use a single line diagram to write a switching sequence to safely isolate an electrical device for work; Validate existing operating orders and switching procedures; and Develop and maintain mandated documentation for all electrical equipment isolation and maintenance work.

- Single Line Diagrams
- Using Prints
- Electrical System Drawings
- Safety Documentation
- Isolation
- Lockout/Isolation
- Switching Workshop

WORKING ON HIGH VOLTAGE ELECTRICAL EQUIPMENT

- Isolation And Lockout
- Warning Signs

WORKING ON DE-ENERGIZED HIGH VOLTAGE POWER SYSTEMS

- Isolation And Lockout
- Person In Charge
- Switching Sequences
- Isolating Devices
- Grounding And Blocking
- Working With Multiple Authorities

WORKING CLOSE TO ENERGIZED HIGH VOLTAGE EQUIPMENT AND CONDUCTORS

- Minimum Clearances
- General Limits Of Approach
- Assurance In Writing
- Assurance Not Practicable
- When Is A Worker Specially Trained And Qualified
- Adjusted Limits Of Approach
- Emergency Work Procedures
- Authorization By Owner To Perform Work

COURSE TIMETABLE:

Start: 10 am Eastern Time

Finish: 4:30 pm Eastern Time
