

Electrical Safety Training for Facility Operations and Maintenance

University and College facility managers understand the critical importance of maintaining a safe and efficient campus environment. With electrical systems becoming increasingly complex, it's essential to ensure electricians and maintenance staff have the expertise to perform their duties safely and effectively.

The Electricity Forum Training Institute is a leading authority in comprehensive electrical safety training programs. Our institute is renowned for its certified live online or in-person electrical safety courses, specifically designed to meet the latest industry standards and best practices, ensuring the utmost safety for your electrical teams.

NFPA 70E ARC FLASH TRAINING

Arc Flash Training equips your qualified electricians with the knowledge and skills to safely determine and mitigate arc flash hazards.

Electrical Safety Training for Facility Operations and Maintenance

We have a proven track record of more than 35 years of collaborating with similar institutions, such as University of Southern California, Duke University, University of Alabama, Caltech, University of Illinois, Illinois State University, University of Nebraska and many other leading educational institutions. These partnerships underscore our commitment to delivering top-tier Arc Flash and Electrical Safety training that meets the unique needs of educational facilities.

By investing in our training, you'll benefit from:

- **Reduced risk of electrical accidents and injuries:** Protecting your valuable workforce, minimize potential liability and reduce electrical equipment downtime.
- **Improved compliance with electrical safety regulations:** Ensuring your institution meets all necessary OSHA standards and regulations.
- **Enhanced productivity and efficiency:** Confident and well-trained staff work more effectively.

Our comprehensive training not only protects your employees and minimizes equipment downtime and potential liabilities but also ensures your facilities operate smoothly and efficiently. This is the value you can expect from our training programs.

Investing in our training programs is an investment in the safety and efficiency of your operations. Let us help you create a safer working environment for your team.

Over the years, students from the following US Colleges and Universities have enrolled in our Arc Flash/Electrical Safety Training courses:

Auburn University	North Carolina State University	University of California San Diego
Bellingham Technical College	Northeastern University	University of California Santa Cruz
Bucknell University	Northwest Lineman College	University of Colorado
California Institute of Technology	Ohio State University	University of Connecticut
California State Polytechnic University	Oregon State University	University of Denver
Carnegie Mellon University	Penn College of Technology	University of Florida
Clarkson University	Pensacola Christian College	University of Georgia
Cleveland State University	Pittsburg State University	University of Houston
College of Staten Island	Portland State University	University of Illinois
Colorado State University	Princeton University	University of Iowa
Columbia University	Purdue University	University of Louisville
Cornell University	San Francisco State University	University of Maine
Davis Applied Technology College	San Joaquin Valley College	University of Massachusetts
Duke University	San Jose State University	University of Miami
Eastern Florida State College	Santa Clara University	University of Montana
El Paso Community College	South Carolina State University	University of Nebraska
Georgetown University	South Florida State College	University of Nevada
Grand Rapids Community College	Southcentral Kentucky Technical College	University of North Carolina
Illinois State University	Southern Illinois University	University of Oklahoma
Indiana University	St. Petersburg College	University of South Florida
Ivy Tech Community College	Stanford University	University of Tennessee
John Wood Community College	State Technical College of Missouri	University of Texas
Lake Washington Technical College	State University of New York	University of Vermont
Lewis & Clark College	Stony Brook University	University of Wisconsin
Lincoln College	Texas State Technical College	Utah Valley University
Lone Star College	Tulane University	Wake Tech Community College
Louisiana Tech University	Tuskegee University	Washington State University
Madison College	University College Dublin	Washington University School of Medicine
Mountain View College	University of Alabama	Waukesha Area Technical College
Mt. San Antonio College	University of Baltimore	Western Technical College
New Mexico State University	University of California Davis
